

## BioTrade2020plus

# Supporting a Sustainable European Bioenergy Trade Strategy

Intelligent Energy Europe IEE/13/577/SI2.675534

### Deliverable 6.2 - M6

# Report on Set-up and Engagement of Working Groups (M6)

Publicity level: Partners/EASME

Date: 15/08/14

#### The BioTrade2020plus Project

#### **Objectives**

The main aim of BioTrade2020plus is to provide guidelines for the development of a **European Bioenergy Trade Strategy for 2020 and beyond** ensuring that imported biomass feedstock is sustainably sourced and used in an efficient way, while avoiding distortion of other (non-energy) markets. This will be accomplished by analyzing the potentials (technical, economical and sustainable) and assessing key sustainability risks of current and future lignocellulosic biomass and bioenergy carriers. Focus will be placed on wood chips, pellets, torrefied biomass and pyrolysis oil from current and potential future major sourcing regions of the world (Canada, US, Russia, Ukraine, Latin America, Asia and Sub-Saharan Africa).

BioTrade2020plus will thus provide support to the use of stable, sustainable, competitively priced and resource-efficient flows of imported biomass feedstock to the EU – a necessary pre-requisite for the development of the bio-based economy in Europe.

In order to achieve this objective close cooperation will be ensured with current international initiatives such as IEA Bioenergy Task 40 on "Sustainable International Bioenergy Trade - Securing Supply and Demand" and European projects such as Biomass Policies, S2BIOM, Biomass Trade Centers, DIA-CORE, and PELLCERT.

#### **Activities**

The following main activities are implemented in the framework of the BioTrade2020plus project:

- Assessment of sustainable potentials of lignocellulosic biomass in the main sourcing regions outside the EU
- Definition and application of sustainability criteria and indicators
- Analysis of the main economic and market issues of biomass/bioenergy imports to the EU from the target regions
- Development of a dedicated and **user friendly web-based GIS-tool** on lignocellulosic biomass resources from target regions
- **Information to European industries** to identify, quantify and mobilize sustainable lignocellulosic biomass resources from export regions
- **Policy advice on long-term strategies** to include sustainable biomass imports in European bioenergy markets
- Involvement of stakeholders through consultations and dedicated workshops

More information is available at the BioTrade2020plus website: www.biotrade2020plus.eu

#### **About this document**

This report corresponds to D6.2 - M6 - Report on Set-up and Engagement of Working Groups (M6). It has been prepared by: WIP.

Start date of project: 01-03-2014	
Duration:	30 months
Due date of deliverable: Month 6	
Actual submission date: Month 6 – August 2014	

Work package	WP6	
Task	Task 6.2	
Lead contractor for this	WIP	
deliverable		
Authors	Rainer Janssen and Dominik Rutz	
Collaborations	All BioTrade2020plus partners	

Dissemination Level			
PU	Public		
PP	Restricted to other programme participants (including the Commission Services)		
RE	Restricted to a group specified by the consortium (including the Commission Services)		
CO	Confidential, only for members of the consortium (including the Commission Services)	Χ	

Version Date		Reason for modification	Status	
1	15/08/14	N/A	Finished	

This project is co-funded by the European Union within the INTELLIGENT ENERGY - EUROPA Programme. Grant Agreement n °IEE/13/577/SI2.675534. The sole responsibility of this publication lies with the author. The European Union is not responsible for any use that may be made of the information contained therein.

#### 1. Stakeholder Involvement within BioTrade2020plus

BioTrade2020plus will ensure cooperation with other European, international and national initiatives and with the key stakeholders in the field. The expected benefits are enhanced knowledge of policymakers, industrial stakeholders, NGOs, biomass standarization and certification organizations and other key actors to help defining long-term strategies to establish sustainable biomass trade from third countries to the EU in 2020 and beyond.

In order to ensure efficient involvement of international experts and stakeholders throughout the duration of the project, three stakeholder working groups are established on the following topics in close cooperation with representatives of the BioTrade2020plus consortium (see section 6 of this document).

- WG1: Biomass importers and end-users (WG lead: DLO, WIP)
- WG2: Biomass producers and exporters (WG lead: IINAS, Imperial, WIP)
- WG3: Long-term strategies and support frameworks (WG lead: VITO, WIP)

The stakeholder working groups will be launched with a first telephone conference and regular (at least bi-annual) telephone conferences will be organised during project implementation (Project duration: March 2014 – August 2016).

It is anticipated that up to 10 stakeholders will participate in each telephone conference with the main aim of sharing and collecting information on the different topic areas.

At the BioTrade2020plus kick-off meeting the following procedure for the establishment of stakeholder working groups was agreed upon:

- 1. Identification of potential stakeholders for the three working groups by all consortium partners
- 2. Elaboration of supporting documents for the invitation of stakeholders, consisting of:
  - a. Document with background information on each working group
  - b. Draft invitation letter for each working group
  - c. Letter of Interest (for signature by interested stakeholders)
- 3. Agreement on priority stakeholders "to be invited" to join the working groups
- 4. Invitation of stakeholders (via email by the respective consortium partners)

The first round of stakeholder invitations has been initiated in May 2014 and stakeholders are being continuously contacted and invited by BioTrade2020plus consortium partners.

The current status of the BioTrade2020plus stakeholder database is presented as Annex 0 to the present report.

#### 2. Focus of BioTrade2020plus Stakeholder Involvement

Today in the EU, the cost-effective achievement of existing and future bioenergy targets set in the legislation implies that in addition to using domestic sustainable and cost-competitive biomass potentials, European markets will also (partly) rely on sustainable and cheap(er) imports of biomass.

Some well-positioned regions of the world are already playing a role in supplying biomass for bioenergy to the European markets and could become increasingly relevant in the near future.

Within *Working Group 1 of the BioTrade2020plus project* specific focus will be placed on the following topics:

- Future demand of lignocellulosic biomass imports into European markets
- Promising market sectors within the bio-based economy
- Cost targets of imported biomass
- Quality requirements of imported biomass
- Sustainability requirements of imported biomass

Within *Working Group 2 of the BioTrade2020plus project* specific focus will be placed on the following topics:

- Sustainable potentials of lignocellulosic biomass in major sourcing regions (Canada, US, Russia, Ukraine, Latin America, Asia and Sub-Saharan Africa)
- Main biomass feedstock for export to EU (wood chips, pellets, torrefied biomass and pyrolysis oil)
- Competitive uses in sourcing regions
- Potential costs and quality specifications of exported biomass feedstock
- Land use change and indirect land use change
- Sustainability concerns in sourcing regions
- National and international policies affecting biomass trade

Within *Working Group 3 of the BioTrade2020plus project* specific focus will be placed on the following topics:

- EU level and EU Member States' policies affecting lignocellulosic biomass trade
- Sustainability concerns in importing and sourcing regions
- Strategies and policies in sourcing regions (1) in relation to biomass trade, (2) to ensure sustainable production of biomass, (3) to promote domestic biomass use (energy or other applications)
- Opportunities and barriers for international biomass trade
- Key principles for sustainable trade
- Long-term strategies and support frameworks in relation to biomass trade

#### 3. Role of Members of BioTrade2020plus Working Groups

The members of the BioTrade2020plus working groups are selected on the basis of their personal capacity and expertise, and as representatives of their organisations.

They are encouraged to be members of the working groups through an invitation letter forwarded together with the present following information document.

#### **Expectations from Members of BioTrade2020plus Working Groups**

Members of the BioTrade2020plus *Working Group 1 – Biomass importers and end-users* - are invited to provide information and advice on the following topics:

- Main stakeholders and key actors involved
- National and international initiatives
- Market prospects of lignocellulosic biomass imports (by sector)
- Quality and cost requirements of imported biomass
- Existing and planned sustainability certification schemes
- Public perception and public acceptance
- Development of policies and long-term strategies

Members of the BioTrade2020plus *Working Group 2 – Biomass producers and exporters* - are invited to provide information and advice on the following topics:

- Main stakeholders and key actors involved
- National and international initiatives
- Sustainable potentials of lignocellulosic biomass in major sourcing regions
- Competitive uses in sourcing regions
- Quality and cost of exported biomass
- Existing and planned sustainability certification schemes
- Public perception and public acceptance in sourcing regions
- Policies and long-term strategies for international biomass trade

Members of the BioTrade2020plus *Working Group 3 – Long-term strategies and support frameworks* - are invited to provide information and advice on the following topics:

- Main stakeholders and key actors involved
- Existing policies, both in the EU and in the main sourcing regions, which impact international biomass trade
- (Perception of) sustainability concerns of biomass production in the main sourcing regions
- Policies and strategies in the sourcing regions on the promotion of domestic biomass use (e.g. for energy or transport fuels) and on sustainability requirements for (lignocellulosic) biomass production
- Potential risks and impacts of policy changes in these regions

- Opportunities and barriers for international biomass trade, and the way these could be addressed through policies and regulatory measures
- Key principles for sustainable trade, e.g. in terms of sustainability, resource efficiency and avoiding market disturbances (in sourcing and destiny areas)
- Recommendations for long-term strategies and support frameworks in relation to biomass trade

Furthermore, members of the working group will be invited to address specific issues in the field of sustainable biomass trade brought to the forum by representatives of the BioTrade2020plus consortium.

#### Activities of BioTrade2020plus Working Groups

Members of the BioTrade2020plus Working Groups are invited to participate in the following project activities:

- Regular (at least bi-annual) telephone conferences
- Project workshops (upon availability)
- Final BioTrade2020plus international conference (upon availability)

Invitations, background information and a detailed agenda of the specific issues to be discussed will be provided to all working group members at least 14 days prior to the telephone conference.

Information on BioTrade2020plus project workshops and the final project conference will be distributed to all working group members well in advance.

Material is discussed in BioTrade2020plus Working Groups on the basis that it is confidential to the group. The content of the Working Group telephone conference minutes should also be treated with confidentiality. Findings from the project may be disseminated informally in advance of publication, providing that there is clear agreement with the partners that this is appropriate.

#### 4. Membership Status of BioTrade2020plus Working Groups

This section presents an overview of the current (August 2014) membership status of the stakeholder groups established in the framework of the BioTrade2020plus project. The detailed status of the BioTrade2020plus stakeholder database is presented as Annex 0 to the present report.

#### 4.1 Overview of Membership Status

Table 1 presents an overview of the membership status (14 August 2014) of the three BioTrade2020plus working groups with respect to (generally) identified stakeholders, stakeholders invited, stakeholders who have confirmed (orally or by email) their interest to join working groups, as well as stakeholders who have already signed and submitted a Letter of Interest to contribute to BioTrade2020plus stakeholder activities.

Table 1: Overview of BioTrade2020plus working group membership status (14 August 2014)

Working Group	Stakeholders identified	Stakeholders invited	Stakeholders interested	Signed Letters of Interest
WG 1	50	26	11	2
WG 2	49	19	5	2
WG 3	70	26	10	5

#### 5. Activities of BioTrade2020plus Working Groups

This section presents activities performed in the framework of the three stakeholder groups established in the framework of the BioTrade2020plus project (Status: August 2014).

#### **5.1 Overview of Working Group Activities**

Table 2 presents an overview of activities (telephone conferences, workshops etc.) performed in the framework of the three stakeholder groups established in the framework of the BioTrade2020plus project (Status: August 2014).

Further details on each stakeholder working group activity are presented in the following subsections.

Table 2: Overview of BioTrade2020plus working group activities (14 August 2014)

Date	Working groups involved	Partners responsible*	Type of activity	Topics discussed
January 2015	WG1,2,3	UU, IINAS, WIP	Telefone conference	Data collection for case studies in MZ, KE, IN
11.12.2014	WG1,2,3	IINAS, IC, WIP	Telefone conference	Sustainability indicators for biomass trade
05.12.2014	WG1,2,3	IINAS, IC, WIP	Telefone conference	Sustainability indicators for biomass trade
27.11.2014	WG 3	VITO, WIP	Telefone conference	Key principles for sustainable biomass trade
24.10.2014	WG1,2,3	VITO, UU, WIP, CENER	Stakeholder workshop, Brussels	Definition of sustainable export potentials  Opportunities and risks connected with biomass trade  Key principles for sustainable biomass trade

<sup>\*</sup> CENER will support WIP and rest of partners in the establishment and development of WG activities

#### 5.2 Telephone conference on data collection for case studies – Jan. 2015

This stakeholder telephone conference will be jointly organized by IINAS, UU and WIP.

The final selection of the date, the elaboration of background information and a detailed agenda as well as the invitation of stakeholders to join this telephone conference will be done in January 2015.

# 5.3 Telephone conference on key principles for sustainable trade – 27 Nov. 2014

This stakeholder telephone conference will be jointly organized by VITO and WIP on 27 November 2014.

#### 5.4 Telephone conference on sustainability indicators – Dec. 2014

These stakeholder telephone conferences will be jointly organized by IINAS, IC and WIP.

# 5.5 International Workshop "Towards Sustainable International Biomass Trade Strategies" – 24 October 2014

This stakeholder workshop was jointly organized by VITO, UU, WIP and CENER. It took place on 24 October 2014 in Brussels, Belgium. Stakeholders were cordially invited to join this workshop which was co-organised by the BioTrade2020plus consortium and IEA Bioenergy Task 40.

This workshop aimed to bring people together to initiate discussions on how these trade strategies can be framed. The central points of discussion were (1) how to define sustainable export potentials, (2) which opportunities and risks are connected with biomass trade and how these can be addressed, and (3) which are the key principles that sustainable biomass trade should fulfil – one important point is the interaction between local use and exports in the sourcing regions.

#### 6. BioTrade2020plus Working Group Contacts

The following contact persons are responsible for activities within the BioTrade2020plus stakeholder working groups.

#### Contact - BioTrade2020plus Working Group 1- Biomass importers and end-users

Alterra, Wageningen University and Research Po Box 47 6700 AA Wageningen The Netherlands

Dr Gert-Jan Nabuurs Dr Berien Elbersen Dr Wolter Elbersen Tel.: +31 6 10559433

Email: Gert-jan.nabuurs@wur.nl Berien.elbersen@wur.nl Wolter.elbersen@wur.nl

#### Contact - BioTrade2020plus Working Group 2 - Biomass producers and exporters

IINAS – International Institute for Sustainability Analysis and Strategy GmbH Heidelberger Str. 129 ½ D-64285 Darmstadt Germany

Dr Leire Iriarte

Tel.: +34 (619) 836-414

Email: li@iinas.org

Imperial – Imperial College London, Centre for Environmental Policy 14 Princess Gardens South Kensington, London SW7 1NA United Kingdom

Dr Rocio Diaz-Chavez Tel.: + 44 20 75949338

Email: r.diaz-chavez@imperial.ac.uk

## Contact - BioTrade2020plus Working Group 3 - Long-term strategies and support frameworks

VITO - Flemish Institute for Technological Research Boeretang 200 BE-2400 Mol Belgium

Ir. Luc Pelkmans Tel.: +32 14 33 58 30

Email: luc.pelkmans@vito.be

#### **Contact - BioTrade2020plus Stakeholder Involvement**

WIP Renewable Energies Sylvensteinstr. 2 D-81369 Munich Germany

Dr Rainer Janssen Dipl.-Ing. Dominik Rutz M.Sc. Tel: +49 (0) 89 720 12743 Fax: +49 (0) 89 720 12791

Email: rainer.janssen@wip-munich.de dominik.rutz@wip-munich.de

#### 7. Supporting Documents - Annexes

The following supporting documents for the establishment of BioTrade2020plus stakeholder working groups have been elaborated and presented as Annex to the deliverable report D6.2 (M3).

- (a) Annex 1 Document with background information on WG1: Biomass importers and end-users
- (b) Annex 2 Document with background information on WG2: Biomass producers and exporters
- (c) Annex 3 Document with background information on WG3: Long-term strategies and support frameworks
- (d) Annex 4 Invitation letter for stakeholders of WG1
- (e) Annex 5 Invitation letter for stakeholders of WG2
- (f) Annex 6 Invitation letter for stakeholders of WG3
- (g) Annex 7 Draft Letter of Interest (LoI)

Furthermore, the current status of the BioTrade2020plus stakeholder database is presented in Annex 0 to this deliverable report.

#### 8. BioTrade2020plus Consortium

#### CENER - National Renewable Energy Centre, Biomass Department, Spain

Project Coordinator BioTrade2020plus

Contact persons: David Sánchez González & Inés del Campo Colmenar

#### Imperial – Imperial College London, Centre for Environmental Policy, United Kingdom
